Press Release

MICROPLEX launches new, Line Printer replacement, continuous form laser printer.

The SOLID F32 is the new, wide-format, continuous form laser printer, offered at Line Printer pricing!

Solon, Ohio – January 05, 2005: MICROPLEX proudly announced the launch of the long anticipated, continuous form laser printer, the SOLID F32. The SOLID F32 is targeted as the first true Line Printer replacement, laser solution. The F32 boasts a list of technology rich features, including: 600 x 600 dots/inch laser quality print resolution, 15” wide continuous forms handling capability, small footprint, low power consumption, reliable LED laser imaging, all standard industry Line Printer emulations, onboard Ethernet and USB connectivity and all of these features offered at or below Line Printer prices.

“We are very excited to release the SOLID F32 to our targeted Line Printer markets,” states Mark Merhab, Director of the Western Region for MICROPLEX. “This laser product solution is what our Distribution Channel and also the Line Printer end user base has requested over the last decade. The F32 will allow truly seamless migration from the legacy Line Printer applications to an affordable, continuous laser solution. Now these markets can increase their production capabilities, handle any graphics data requirements and still meet their targeted departmental budgets,” continues Mr. Merhab.

MICROPLEX Electronic Printing Systems, Ltd. is a Solon, Ohio based printer manufacturer and is a leader in continuous form laser printers, for mid-range production applications. MICROPLEX’s products are available worldwide through their very experienced Channel Partners and MICROPLEX has offices in the USA, Germany, and France .
