

SPECIFICATIONS

BURSTER / DECOLLATOR COMBINATION V 9000

Standard Features: BURSTER/DECOLLATOR

V 9000

Max. form width, gross (before margin trimming)	15 1/3"
Max. form width, net (after margin trimming)	14 2/3"
Electronic length setting with standard sizes 0", 4", 5,5", 8", 8,5", 11", 12"	●
Min./max. form length	4"/ 12"
Max. form set (carbonless)	5 part
Acceptable paper weight range	10-125 lbs
Paper transport by two tractors	●
Combined tractor /margin trimmers with individual operation option	●
Margin trimming (can be switched off)	1/3"-1"
4 stackers	●
Quick-stop button	●
"Clear-jam" button	●
Variable speed	max. 140 ft. per min.
Control panel with LED display	●
Automatic paper jam control	●
Automatic overflow control for stackers	●
Automatic "paper-out" control	●
Paper tray and waste basket	●
Voltage	115 V / 60 Hz
Power-consumption	300 VA
Noise level emission	67 db(A)
Dimensions length x width x height (inches)	46 x 24 x 41
Weight (lbs)	110
Mounted on 4 casters	●
UL approved	●
On-line connection to printer	○
Programming of 3 special form lengths (up to 24")	○
Special installation for 3" forms	○
Paper tray for 2 continuous form sets	○
Center slitter	○
Margin slitters up to 1 2/3"	○
Pre-decollating station for refolding in-line	○

(further options on request)

● = Standard, ○ = Optional, - = Not Available (Subject to technical changes)

Forms management at an excellent price/performance ratio!

The daily handling of continuous forms such as invoices or shipping documents should be done in a way that saves time and money, therefore enhancing your productivity.

Thanks to HEFTER Systemform, it is no longer necessary to use different equipment or even involve tedious manual labor to trim, burst, decollate, and sort continuous forms. HEFTER has created the ultimate solution – the V 9000.

The patented burster/decollator combination found in the V 9000 creates a multifunctional machine:

- Margin trimming**
- + Bursting**
- + Decollating**
- + Sorting**

...In one step!

The V 9000 is a top-of-the-line HEFTER Systemform product and is considered the ultimate in advanced technology machines:

- A user-friendly control panel with LED display.
- Automatic paper feed.
- Tractor infeed for accurate paper transport.
- Individually adjustable margin cutters make changing form sizes a breeze.

- Electronic length settings with 6 standard sizes from 4" to 12".
- Electronic form selector lock to prevent incorrect use.
- Automatic sorting of multipart forms into up to 4 stacks.
- Automatic "paper-out", "stacker full", and "jam" control ensures that the machine can work unattended.
- Automatic jam clearance.
- Fast, quiet, and capable of processing up to 9,000 11"-forms per hour.
- Paper tray and waste basket.
- Easy relocation because the machine is mounted on casters.

A number of options are available to improve the versatility of your operation:

- A predecollating station can be used to allow some of the multipart form set to be decollated and bursted, while the other forms remain in a continuous format.
- Thanks to HEFTER's patented bursting principle you are guaranteed that two-up forms will be bursted perfectly every time. This means that an 11"-form with a 3" check attachment (14" in total) will be bursted perfectly each time a new form needs to be separated.

With more than 16,000 users worldwide, no wonder HEFTER Systemform is the market leader.
