Press Release

MICROPLEX, Ltd. launches new, high production burster

The new CT 30/31 high-speed burster, is best in class.

Solon, Ohio – November 15, 2003: MICROPLEX, Ltd. proudly announced the launch of a robust, high quality, high speed, burster product line, the CT 30 and CT31. The product launch includes an installation of a CT30 burster at a Washington State facility and is a welcomed bursting solution for high volume printing environments.

“MICROPLEX, Ltd. is the sole importer of Hefter Systemform burster and decollator products into the USA” states Mark Merhab, Director of the Western Region for MICROPLEX. “The CT product line fills a pent up demand for high volume, high speed bursters in the IT environment. The CT product is truly a state of the art product and is the replacement burster product that the industry has been searching for to replace discontinued older and less competitive products. The resounding consensus by the user group is the CT30 is faster, smaller, quieter and easier to use than their old burster products” continues Mr. Merhab.

Hefter Systemform is a manufacturer of high speed buster/decollator and other post-processing equipment that is based out of Germany.

MICROPLEX, Ltd. is a Solon, Ohio, based printer manufacturer and is a leader in continuous form laser printers for mid-range production applications. MICROPLEX's products are available worldwide through very experienced channel partners and have offices in Germany, France and the USA.
