## **MICROPLEX announces yet another, mid-range production / industrial, continuous form laser printer**

The SOLID F155 is the newest addition to the MICROPLEX family of *continuous form laser printers*.

**Solon, Ohio – August 31, 2005:** MICROPLEX proudly announced the launch of the newest member of their family of continuous form laser printers, the SOLID F155. The SOLID F155 offers a combination of design criteria and technology-rich features that allow it to compete with higher-end, higher-priced production laser printers. These features include: print speed of 155 pages / minute (two-up Letter format), robust monthly duty cycle of 1.5 million pages (two-up Letter format), over 20 print language emulations, 17" print width, 600 x 600 print resolution LED Array imaging technology and low temperature Xenon Flash fusing system.

"The SOLID F155 offers a very low-cost alternative to higher-end production laser printers." states Theresa Maroun, Vice President of Marketing for MICROPLEX. "This product pushes the envelope for speed and duty cycle for mid-range continuous form lasers. The F155 is a fine fit for in-house laser quality industrial production or also is a great solution for out-source applications, such as a proof printer or as an efficient, short run printer. The F155 product offering is a new addition that fits well into the MICROPLEX family of continuous form laser solutions. We would love the opportunity to save, production and industrial laser application customers, time and money!" continues Ms. Maroun.

MICROPLEX Electronic Printing Systems, Ltd. is a Solon, Ohio, based printer manufacturer and is a leader in continuous form laser printers for mid-range production applications. MICROPLEX's products are available worldwide from very experienced channel partners and MICROPLEX has offices in Germany, France, Canada and the USA.
