Press Release

MICROPLEX announces two new additions to their, mid-range production / industrial, continuous form laser printer product line

The SOLID F34 and SOLID F64 are new entrants to the mid-range laser printer production market.

Bedford, Ohio – December 29th, 2008: MICROPLEX proudly announces the launch of the newest members of their family of continuous form laser printers, the SOLID F34 and SOLID F64. Both products are heat/pressure fuser based, continuous form laser print engines, with the world-renowned Microplex Print Controller (MPC) technology. The SOLID F64 has PIRA certified MICR, for a great fit into the Banking industry. Both products offer easy-to-operate design, straight through paper paths for worry-free media handling and a small footprint for versatility of locating in various print environments. The SOLID F34 and SOLID F64 also meet the environmentally friendly, **RoHS (Restrictions of Hazardous Substances)** regulations, now enforced in Europe. The SOLID F34 and F64 features include: print speeds of 33 ppm and 63 ppm (two-up Letter format) respectively, integrated media cutter, intelligent **Paper Stacking (iPS)**, **USPS Intelligent Mail Barcode (IMB)** technology, over 20 print language emulations, customized IPDS/IBM environment connectivity and onboard (*no charge*) Ethernet & USB interfaces.

“The SOLID F34 and SOLID F64 are very versatile continuous laser products that fit nicely into several vertical markets, such as Banking, Mailing and many monthly Transaction/Statement applications,” states Andre Fedak, President of MICROPLEX. “These products offer a cost effective, reliable and user-friendly solution for customers that require mid-range continuous form laser production,” continues Mr. Fedak.

MICROPLEX Printware Corporation is a Bedford, Ohio, based printer manufacturer and is a world leader in continuous form laser printers. MICROPLEX’s products are available worldwide from experienced channel partners. MICROPLEX has offices in Germany, France, Canada and the USA.
